## Claims Management Services (CMS)

### Cost-effective Management Full Control of Claims

It is true to say with Demurrage “time is money”. We offer a totally comprehensive web-based solution to ensure all of your claims are logged and processed in a timely fashion helping to eradicate missed claims and the associated financial penalties:

- supports multiple calculation types: owners, contract, barge, deviation, transit, interim, expense & detention
- full claim management and reporting with event diaries and audit trail
- dashboard driven to ensure critical events/timebars are not missed
- interface to your other office systems e.g. to feed operations and contract details

Our simple to use service provides you with a straightforward solution to manage the complex tasks and processes particular to a demurrage environment.

#### The Solution:

1. a web-hosted service. All you need is a web browser supporting immediate access from office, home, hotel, etc
2. no expensive development or implementation costs. Just log on and start using the service
3. simple charging framework means you can take full control of your costs immediately
4. a totally secure infrastructure ensures only you have access to your data
